REASONS FOR ALLOWANCE

1. Claims 1-7, 10-16, and 18 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1 and 18 recite a method of making a solid-type pressure-sensitive adhesive comprising adding a tackifier to a rubbery polymer in the absence of a solvent, kneading the resultant mixture with an isocyanate crosslinking agent in the absence of a solvent for 5 to 40 minutes to crosslink the polymer wherein the crosslinking reaction takes place at the same time as the kneading and the treatment is conducted at a temperature of about 80 to 160°C to produce said solid pressure-sensitive adhesive composition.

The prior art fails to disclose or render obvious a method of making a 100% solid pressure-sensitive adhesive by mixing a tackifier to a rubbery polymer in the absence of a solvent, kneading the resultant mixture with an isocyanate crosslinking agent in the absence of a solvent for 5 to 40 minutes to crosslink the polymer wherein the crosslinking reaction takes place at the same time as the kneading and the treatment is conducted at a temperature of about 80 to 160°C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
